Visual Impairment Rehabilitation Service

**Are you finding it difficult to
see to do everyday tasks?**

**Do you know someone who is
finding it difficult to see to do
day-to-day tasks?**

A Visual Impairment Rehabilitation Officer may be able to help.

Who are Visual Impairment Rehabilitation Officers?

We are specialist workers trained to help you with the management of practical tasks that become difficult for you as a result of living with a significant vision-impairment.

A specialist worker can arrange to visit you at your home.

How can Visual Impairment Rehabilitation Officers help?

We can talk with you about the difficulties you are having and identify sources of help that might be available. The types of training we offer can be divided into four areas:

Independent living skills

- Pouring hot or cold liquids without spilling and in safety.
- Specialist Equipment – talking timepiece to help tell the time.
- Using household appliances with the help of tactile labels.
- Using lighting to maximise remaining vision.
- Labelling systems to identify food items in cupboards.

Mobility

- Moving around the home safely using techniques.
- Outdoor travel skills – including the use of a white cane - symbol, guide or long cane.
- Making the most of any remaining vision to ensure your safety outdoors.

Communication

- Help with recording appointments.
- Help to use a telephone.
- Using magnifiers, which may include electronic aids.
- The teaching of Grade 1 Braille or Moon reading by touch systems.

Training

- Visual impairment awareness - training your colleagues, care managers and homecare staff.
- Presenting our work to community groups.
- Consulting on issues relating to vision impaired people – re: accessible literature, accessible environments.

Do I need to be registered as severely sight impaired/blind or sight impaired/partially sighted to receive help?

We offer services to all adults in the borough with significant sight loss. If you choose not to register, it will not affect your assessment for services.

You can be either certified or registered as:

- severely sight impaired/blind or
- sight impaired/partially sighted or
- having permanent and substantial visual impairment affecting both eyes, not just one eye and where the vision cannot be corrected by prescribed spectacles and/or contact lenses.

A regular eye test and eye examination is important as it helps to monitor the health of your eyes and the quality of your vision. It is recommended that you have your eyes checked at least once every 2 years.

How you can help us

We welcome feedback on how we might improve our service. If you are not happy about the services you are receiving or the way you have been treated, please talk to a member of the team.

We will take your comments seriously and do our best to put things right.

If you are still not happy you can take your complaint further by contacting the:

Customer Feedback Team
